Profile

Full-Stack Software Engineer with 2+ years of experience building responsive web applications using React, TypeScript, Node.js, Angular, REST APIs, MongoDB, and PostgreSQL. Experienced in product development, API integration, authentication, performance optimization, Docker, CI/CD, and AI-assisted agentic coding workflows.

Education

Cosmos College of Management and Technology (Pokhara University) 2019 – 2023
Bachelor of Computer Engineering

Experience

iShani Technology Pvt. Ltd. Dec 2023 – Present
Software Engineer Lalitpur, Nepal

- Develop and maintain production applications using **React**, **TypeScript**, **Angular**, **Node.js**, and REST APIs, focusing on reusable components and responsive interfaces.
- Build REST APIs with authentication, authorization, file uploads, email services, and database operations using **Node.js/Express.js** and **MongoDB**.
- Contribute to applications using **Angular**, **Java Spring Boot**, and **PostgreSQL**, with primary focus on frontend development and API integration.
- Improve application performance through optimized API calls, lazy loading, reusable components, and efficient database queries.
- Deploy applications using VPS, **Docker**, and GitHub Actions; use **Claude**, **Codex**, **Gemini**, and **ChatGPT** in agentic coding workflows for development, debugging, and research.

Projects

Pumorix – Property Management Platform | Live Present

- Contributing to a UAE-based property management platform for landlords and tenants covering property listings, details, bookings, invoices, maintenance, accounting, and related workflows.
- Primarily modifying the UI using **TypeScript**, with additional work on selected **Node.js/MongoDB** backend modules and **Docker**-based development workflows.

Ikhata – Accounting Software | Project Present

- Contributing to an accounting software built with **Angular**, **Java Spring Boot**, and **PostgreSQL**, primarily responsible for frontend development and API integration.
- Gained practical exposure to backend services and PostgreSQL through application data flows and business workflows.

Uturn International Pvt. Ltd. | Live May 2025

- Developed a complete system for a network-based product selling company, including user management, product catalog, order processing, and reporting modules.
- Implemented the responsive frontend using **Angular/TypeScript** and contributed to backend integration with **Java Spring Boot** and **PostgreSQL**.

Koshish CMS | Live Aug 2024

- Developed a CMS for a national NGO to manage blogs, events, media, and internal communication using **React**, **Redux**, **Node.js**, **Express.js**, and **MongoDB**.
- Improved performance using lazy loading, memoization, and optimized api calls.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, Java (basic), HTML5, CSS3

Frontend: React.js, Angular, Redux, Tailwind CSS, Bootstrap, Material UI, Vite

Backend: Node.js, Express.js, REST APIs, JWT, Authentication, Authorization, Java Spring Boot (basic)

Database: MongoDB, PostgreSQL

Cloud & DevOps: Microsoft Azure (basic), Docker, VPS, GitHub Actions, CI/CD

AI & Agentic Development: Claude, Codex, Gemini, ChatGPT

Tools & Concepts: Git, GitHub, Postman, Swagger, VS Code, Antigravity, State Management, Component Architecture, API Integration, Performance Optimization

Certifications

Master REST APIs in Node.js – JobsSnipper Certificate

MERN Stack Training – Broadway Infosys Certificate

Software Engineer Intern – HackerRank Certificate
